1 RATIONALE

Australia has the highest rate of skin cancer in the world. Research has indicated that young children and babies have sensitive skin that places them at particular risk of sunburn and skin damage. Exposure during the first 15 years of life can greatly increase the risk of developing skin cancer in later life. Schools play a major role in minimising a child's UV exposure as children attend during times when UV radiation levels are highest.

2 AIMS

Illawarra Christian School endeavours to minimise the exposure of its students and staff to harmful UV radiation from the sun through:

- Enforcement of a sun smart dress code
- A focus on providing appropriate and sufficient shade facilities.
- Education within the curriculum to develop awareness and foster self-responsibility for skin cancer prevention and early detection.
- A proactive risk management system ensuring sun protection is managed effectively for all school activities.

3 IMPLEMENTATION

- The school will inform parents of this sun-safe policy when a child enrolls.
- The sun-safe policy will be available on the school website.
- The school will seek ongoing support from parents for the policy and its implementation through the newsletter.
- All new staff will be informed of the sun-safe policy at their work health and safety induction.
- Incorporate education programs that focus on skin cancer prevention into the school curriculum.
- Ensure the students wear the uniform in a way that complies with the sun-safe policy.
- Provide 30+ broad-spectrum water-resistant sunscreen when involved in outdoor activity. Students are also encouraged to supply and reapply their own at regular intervals.
- Proactively encourage students in the use of their 30+ broad spectrum screen
- Provide adequate 30+ broad spectrum sunscreen in outdoor Physical Education classes, and outdoor activities. Parents are to advise the school if their child has an allergy to specific sunscreen brand and will use their own or non if this is the case.
- Encourage students without adequate sun protection to use shade areas during morning tea and lunch times.
- Encourage students to wear sunglasses where it is safe and practicable to do so.
- Allow students to wear swim shirts, long or short sleeve of lycra fabric with a UVP rating.
- Encourage all staff to act as positive role models for students in all aspects of sun-safe dress and behaviour.

- Ensure that the risk of exposure to UV radiation is included in the risk assessment for all activities, which will include ensuring that adequate shade is provided for sports carnivals and other outdoor events.
- SunSmart activities and sun protection will form part of the Health and Physical Education curriculum at all year levels.
- Review the school uniform code regularly with consideration to the New South Wales Cancer Fund Sun Smart clothing guidelines.

4 EXPECTATIONS OF STUDENTS

Students should:

- Be aware of the school sun-safe policy.
- Take responsibility for their own health and safety by being SunSmart and complying with school requirements and using 30+ sunscreen and wearing a hat and sunglasses where possible.
- When practicable, use shaded or covered areas when outdoors.
- Act as positive role models for other students in all aspects of SunSmart behaviour.
- Participate in SunSmart education programs.

5 EXPECTATIONS OF STAFF

Staff should:

- Carry out a risk assessment for any outdoor activity and/or follow the UV protection controls established in the risk management plan.
- Remind students of SunSmart behaviour as required.
- Act as good role models with respect to SunSmart behaviour.

6 EXPECTATIONS OF PARENTS

Parents should:

- Provide the components of the School SunSmart uniforms for their child, including the appropriate hat.
- Provide their child with adequate 30+ broad-spectrum water-resistant sunscreen and encourage them to use it.
- Act as positive role models by practising SunSmart behaviour.
- Support the school SunSmart policy.
